PROFILE

I am studying Web Programming and Database Development, and Cybersecurity at Dunwoody College of Technology. I have been a student of technology since I was 9 years old, attending iD Tech camps at Macalester College each summer from that age until I graduated from high school. I am particularly interested in front-end web development and creating an impactful user experience. In addition to achieving the rank of Eagle Scout, I have strong communication skills and love working with people. My hobbies include soccer, skiing, playing board games with friends, cooking, and of course programming projects.

EDUCATION

DUNWOODY COLLEGE OF TECHNOLOGY

2023-present: I will graduate in 2027 with an Associate's Degree in Web Programming & Database Development and a Bachelor's Degree in Cybersecurity.
